Request for a Letter of Reference

Dear Referee,

You have been given this letter by an applicant to the graduate program Computational Systems Biology at Humboldt University Berlin, Germany.

(Information: http://www.berlin-csb.de)

Would you support his or her application by writing a letter of reference? The reference letters that we receive are CRITICAL for the final decision: Thus we ask for frank, specific, personal letters that detail to us the potential, strengths and weaknesses of the candidate, tell us about his/her personality and motivation to pursue a Ph.D. research project, and give a clear conclusion whether the candidate has the potential to succeed in our research training group Computational Systems Biology.

We kindly ask you to submit the letter of reference via email (info@berlin-csb.de) by **21 June 2015** at the latest!

Thank you very much!

Yours sincerely,

Cordelia Arndt-Sullivan
(Coordinator CSB)
