## Equipment and Files

There will be a projector and a laptop at your disposition in every conference room. Please make sure that you bring your presentation on an external storage device (USB-Stick). The presentation file has to be in PDF-format. Due to time constraints it will be impossible to connect your own laptop to the projector. For convenience, the file should be named in the following way: *author\_date.pdf*.

Please upload your files *15 minutes* before the session starts. A member of our conference support team will make sure that all presentation files are transferred to the laptop properly and that they are free from defects. Before the conference, please double-check that your file is working and send them to your e-mail address as a back-up.

## Instructions for the Chair of the Session

Please make sure that all speakers are present, that the preparations are done 5 minutes before the session starts, and that the session begins on time.

## Poster Sessions

Please present only one poster. You will be able to exhibit your poster on a poster table which you can choose on your own. Please note that we do not allocate posters to tables.

The poster table has the size A0 (98 cm x 130 cm).

To fix your poster on the table we will provide you with pins and tape which you can obtain at the registration desk.

It is also possible to exhibit additional material related to your study. A table next to the poster table will be available.
